

Take control and enjoy the view.

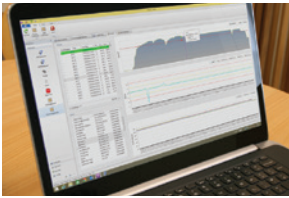

EFI™ Clarity incorporates data from all EFI Escada control systems, making it easier than ever to oversee the entire operation. Each EFI Escada product has been developed to communicate as much information as possible, which enables you to analyse detailed findings through this clear and easy to use data reporting system.

Traceability and analysis

Bring "Clarity" with our new management interface, with all of your data presented in an intuitive and unique format. Clarity allows you to perform efficient and rapid analysis. It is completely customisable, allowing you to manage your data according to your needs and schedule your data analysis with automated production of custom reports.

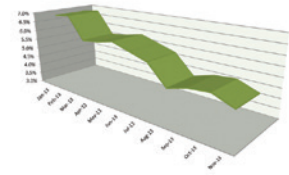

EFI Clarity features

See through the data cloud

Clarity brings together all production information in a user-friendly interface. It drastically reduces the challenges and duration of data analysis.

Track your key parameters

Monitor your production by using the Clarity Dashboard which eases the tracking of your key parameters. Look at speed, waste, warp and sensors, and chart these measurements in an instant to evaluate your process.

Produce bespoke reports

In addition to the standard reports integrated into Clarity (e.g. OEE report, summary of waste and many more), you can also create bespoke reports to perfectly fit your needs.

Customer service

EFI Escada offers comprehensive support packages for all of our products. Our dedicated support team is on-hand 24 hours a day, 7 days a week, committed to providing excellent after sales care and giving you the reassurance that assistance is only a call away. Our customer service department also incorporates a specialist training team who will deliver training at every step of the installation process with courses that can be tailored to meet your requirements.

You can also feel comfortable about the future of your EFI Escada products, as we ensure upgrade paths for all of our systems keeping your business right up to date.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalised documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
