Process Shipper

Integrated Shipping Solutions

Transportation management makes every shipment count

ePS Process Shipper is the award-winning multi-carrier shipping management software designed to streamline and automate shipping processes.

Automation

By eliminating touchpoints and accelerating workflows, Process Shipper allows companies to lower costs and transform shipping departments into profit centers by:

- Reducing errors by eliminating double-entry of data

- Increasing accuracy of shipping information

- Providing visibility into shipping statuses and costs

- Improving employee productivity

- Reducing shipment-related inquiry calls

- Speeding up processes

- Improving cash fl ow by reducing SDO (sales days outstanding)

- Improving the ship-to-bill cycle

- Helping to find the lowest freight cost

"200% improvement in shipping throughput. 40 hours per week savings in customer service. 50% improvement in processing of large batch distribution lists. "

STEVE HALEY,
YUNKER INDUSTRIES

Integration

ePS Process Shipper helps you grow your business by providing a complete multi-carrier shipping solution with standard integration to your ePS MIS system. ePS Process Shipper provides increased productivity, reduces labor costs and provides visibility and automated communication of shipping information company-wide.

When shipments are executed in ePS Process Shipper, all freight charges, tracking numbers and other shipping data are automatically updated in your integrated MIS/ERP system.

Scalability

With proven scalability, Process Shipper is designed to fit your business today and grow with your business tomorrow.

- **Locations:** Process Shipper can be deployed at a single location or multiple locations throughout your company

- **Shipping carriers:** Process Shipper supports small parcels, couriers, LTL shipments and company vehicle shipments

❝ We reduced our small package shipping personnel by one fulltime employee the first week of going live with Process Shipper ❞

SUZANNE KUHNS,
SIGNATURE GRAPHICS

Carriers

ePS Process Shipper is a single solution that replaces the carrier provided systems and is designed to handle 100% of your shipping needs including small parcels, couriers, LTL and company vehicle shipments.

Carriers and connections supported:

- FedEx® Web services
- UPS® Web services
- DHL® Web services
- USPS® through Endicia®
- LTL (Less Than Truckload) carriers
- FTL (Full Truckload) carriers

- Company vehicles
- Other "generic couriers"
- Speedee
- Canada Post
- Purolator
- Loomis

"Process Shipper brings the welcome riddance to end-of-day processing. Real time put-back in Pace/PrintStream nets multiple efficiencies from the elimination of manually keyed shipment details to the reduction of non-revenueproducing phone calls and emails between customer service and shipping "

SALLY GILBERT,
GILSON GRAPHICS
